- Traditional Redistricting Principles
- Census Data
- Public Submissions
- Community of Interest Testimony
- Current Lines
- Draft Maps
- Next Steps

Traditional Redistricting Principles

Complying with the Fair Maps Act

The Fair Maps Act passed by the Legislature mandates a set of criteria we must follow when drawing ward plans.

- Relatively equal size - people, not citizens
- Contiguous – wards should not hop/jump
- Maintain "*communities of interest*"
- Follow city and census designated place boundaries
- Keep wards compact – appearance/function

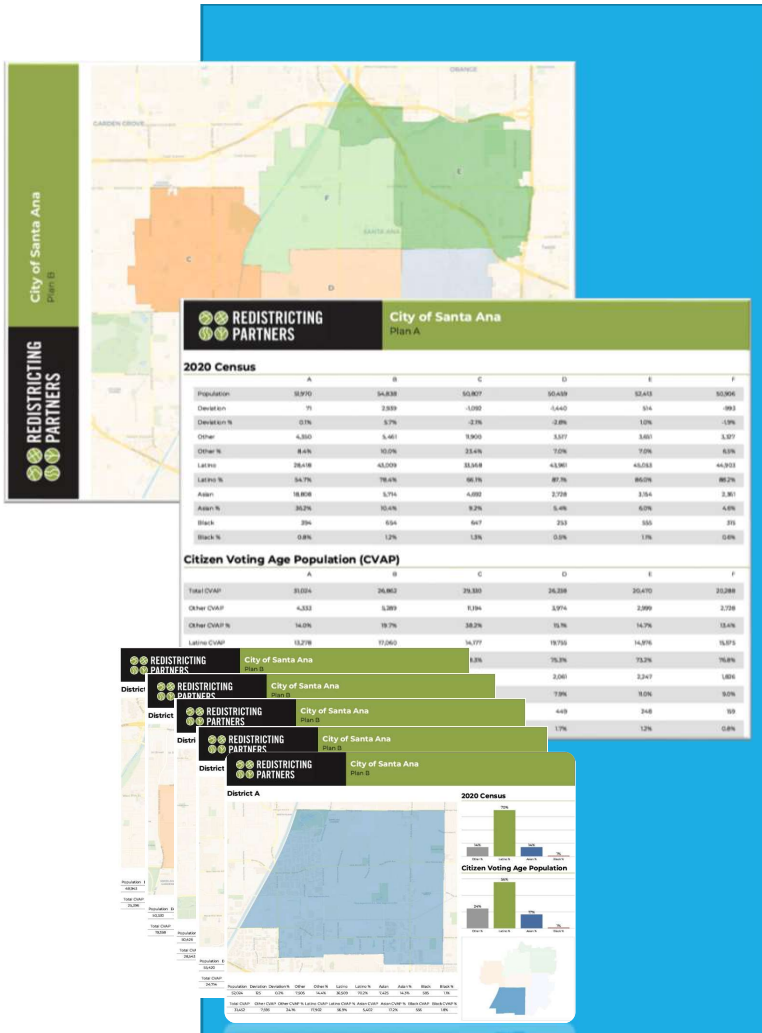
From COI to Maps

With the Fair Maps Act requiring cities to include the public input in the redistricting process, we move redistricting out into the public, with maps driven by Community of Interest testimony.

Input from community drives process with multiple ways for the public to engage.

Rules for process emphasize the importance of traditional criteria and minimizing divisions of neighborhoods.

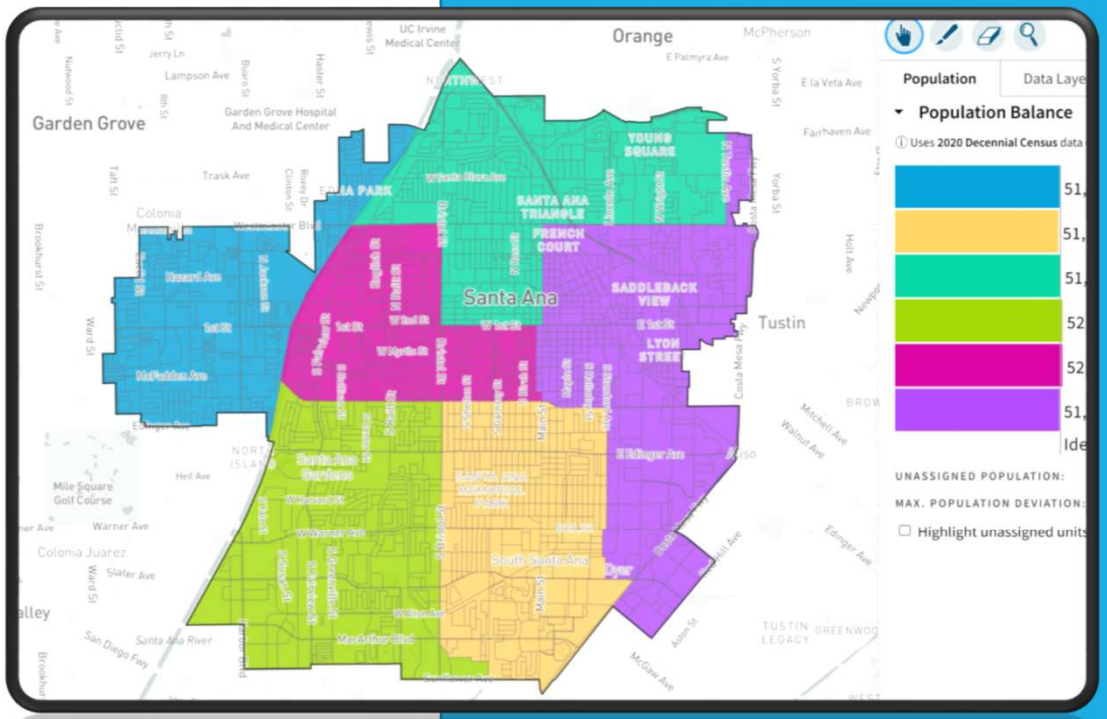
Releasing maps for feedback – today we will see plans to spark more public engagement.



Public Submissions

The City of Santa Ana City Council obtained public map submissions

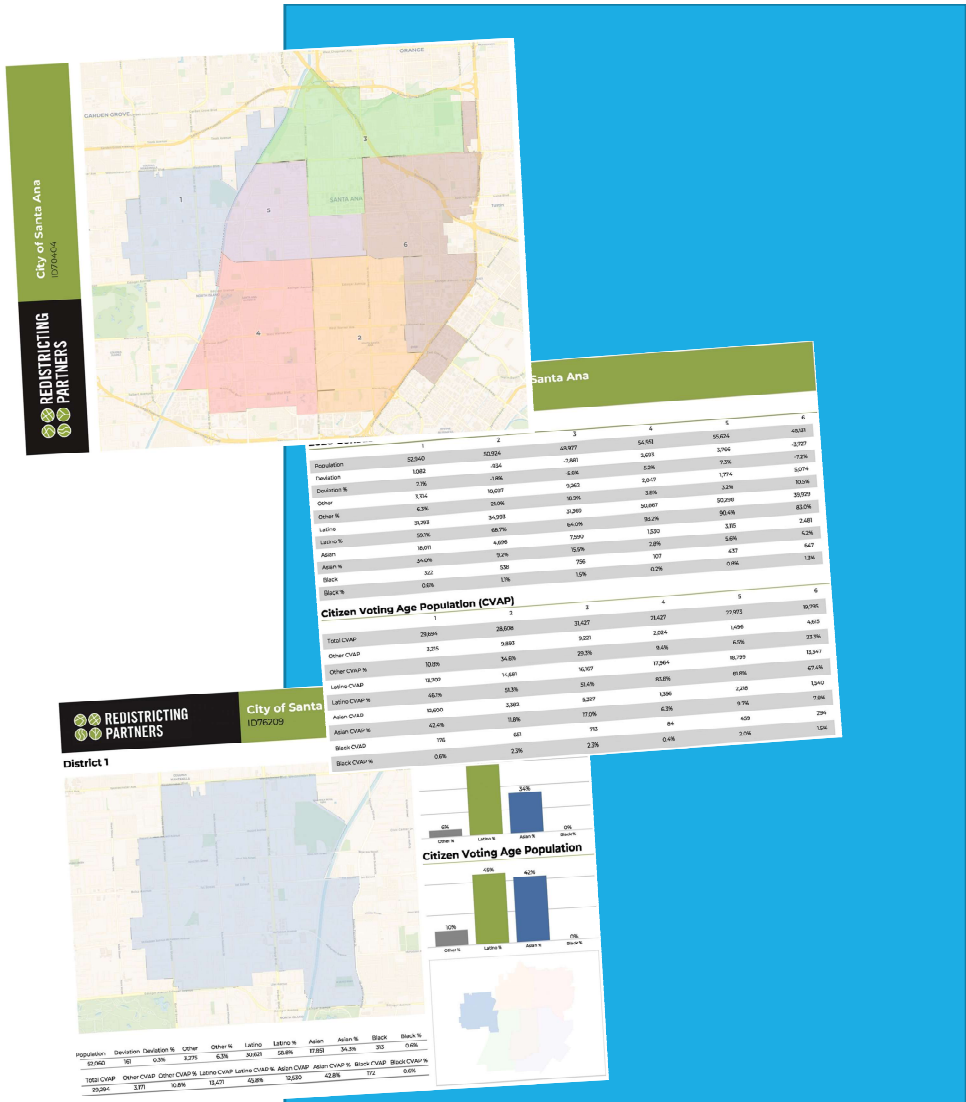
- Use of the online mapping tool DistrictR to solicit input.
- Hosted 6 Community Workshops + additional community presentations
- Online training of DistrictR at each Community Workshop.



Public Submissions

We have converted all DistrictR submissions, received by February 7th, to our “Atlas” format which includes:

- Cover page with full districting plan overview.
- Data table with population, deviation, ethnic population, Citizen Voting Age Population (CVAP)Ethnicity and breakdowns for each ward (numbered 1-6 for a complete plan)
- Individual ward maps with street-details and data tables and charts.



Public Submissions

In addition to PDF maps of all submissions, there are also web maps provided.

These allow the user to zoom in to street level for a closer inspection of where ward lines are placed.

Draft Plans A, A2,

Councilmembers were provided a packet with two consultant created plans based on traditional redistricting criteria, COI testimony and amendments from the council. These maps were posted to the city's website for the public prior to Draft Map hearing.

- Wards are letters, not numbers. This is a temporary structure for identifying seats as the final draft plan is required to be numbered based on a formula in the charter.

- Each draft has been created with a less than 10% total deviation.

Draft Plans F, J, J2, K
SARC1, SARC2

Councilmembers were provided a packet with six plans based on public DistrictR submissions; the plans were reviewed to ensure they follow traditional redistricting criteria. These maps were posted to the City's website for the public prior to Draft Map hearing.

- Wards are letters, not numbers. This is a temporary structure for identifying seats as the final draft plan is required to be numbered based on a formula in the charter.

- Each draft has been created with a less than 10% total deviation.

Amendments to Plans

Changes to plans may need balancing and understanding of tradeoffs. Three types of changes.

1) Keeps within deviation and doesn't necessitate other changes.

2) Identifying a change and a possible tradeoff with that same ward – a "one to one swap"

3) Identify a change and a set of wards that involves multiple wards – a "rotation"

Amendments to Plans

If there are proposed changes we can look at those individually and provide input on if they can be achieved easily or require more adjustments.

What's Next

- Official council drafts will be made public in advance of a citywide public draft feedback hearing.
- All council draft plans will go to a final plan selection hearing.
- Final Plan selection hearing will consider only draft plans that have been made public for seven days.
- *Numbering of wards is done <u>at the end of the process</u>*
