THEREFORE, based on the foregoing incorporated recitals and in consideration of the mutual covenants and conditions set forth in this Contract, the Parties hereby agree to the following:

**SECTION 1. PROJECT DESCRIPTION**

The City of Santa Ana is seeking funds to support project planning for its Washington Avenue Well project. The proposed Washington Avenue Well Project is located at the northwest corner of the intersection of East Washington Avenue and Penn Way. The property is owned by the City of Santa Ana. The proposed well would pump groundwater into the City's existing water distribution system. The water produced from the well will be disinfected using sodium hypochlorite (NaOCL) before it is discharged into the water distribution system. The design capacity of the well is projected to be 2,500 to 3,000 gallons per minute and would be equipped with a 350 to 400 HP motor. The proposed Washington Well will be drilled to a depth of about 1,300 feet below ground surface and be installed with a minimum of 18-inch diameter casing.

Other elements of the project include several concrete block wall material storage bins; On-Site Generation (OSG) disinfecting equipment housed in a building; buildings for well head and piping, electrical cabinets and SCE switchgear; and low impact desi<sub>g n</sub> (LID) on-site improvements including bio-swales, bio-retention facilities and pervious pavement or pavers. The outer perimeter of the site will have a facility identification si<sub>g n</sub>, informational plaques, drought tolerant/California friendly landscaping and a perimeter walkway.

The awarded SAWPA amount of \$100,000 will be used to start environmental documentation and desi<sub>g n</sub> phase of the project. The City of Santa Ana has completed a feasibility study and developed the attached conceptual desi<sub>g n</sub> plans for the Washington Avenue Well Project. **PROGRAM ELEMENT 1: Strengths & Needs Assessment**

The combined activities of this program element will produce several outcomes. First, it will build upon earlier work, participants in the OWOW process and the OWOW Plan Update 2018 will achieve a better understanding of the water management needs of overburdened and underrepresented communities so that resources and funding can be more effectively directed to meet those needs. Second, this program element will acknowledge and document the strengths of overburdened and underrepresented communities so that as programs are developed to meet their needs the communities will have agency and be appropriately engaged in those efforts. Lastly, this program element will, through its assessment process, create new networks of familiarity between local elected or community leaders and water management leaders.

Activity 1 DCI Program Technical Advisory Committee (TAC)

The Pillar workgroup will develop the OWOW Plan Update 2018 chapter about overburdened and underrepresented communities.

**Deliverables:**

- ☐ Notice of Meetings
- ☐ Roster of DTC Pillar participants
- ☐ OWOW Plan Update 2018 Chapter

Activity 3 Engage Local Elected Leaders

**Activity 17 Community Engagement Interns Program**

This program will support water-related overburdened community engagement internships for students from the CSU, UC and community college campuses of the watershed. The program, administered by the CSU DACC, will seek applications from public agencies and environmental or social justice nongovernmental organizations for the services of pairs of interns to assist with community engagement or public affairs work related to disadvantaged communities; approximately 20 interns per year.

The application process will include a detailed description from each applicant about the specific tasks they will assign to the interns. Each organization will request the services of two interns from CSU to assist with community engagement, public affairs or community education activities. Public affairs may include marketing of community programs and events. Community education activities may include preparing community members to participate effectively in water planning to the benefit of their communities.

The intern program will model an existing program and capacity of CSU, funded by the US Department of Agriculture. Interns will be selected from the CSU campuses (San Bernardino and Fullerton), the UC campuses (Riverside and Irvine), and the many community colleges in the Santa Ana River watershed. Efforts will be made to recruit interns who are themselves from the watershed overburdened communities.

Half-way through the internships, the intern will produce an interim activity report. Upon completion of the paid internship, the student will develop a final activity report. The final reports are posted on-line as a part of the CSU Library special collection. The cohort of interns will be mentored by CivicSpark Water Fellows, housed at SAWPA, for trainings and networking meetings, related to IRWM community engagement efforts.

This activity provides multiple types of capacity building in the watershed: by supporting students, supporting organizations, and by creating new sustainable and contiguous networks of familiarity between organizations, and between communities and the water organizations.

These outcomes will represent a strengthened understanding by the RWMG of community needs, and ensure that future implementation/construction funding and activities are directed to meeting the needs identified by members of overburdened communities.

#### **Activity 18 Technical Assistance for Community Needs**

During engagement efforts the program team will learn of projects, plans and programs. Following evaluation of these projects, plans and programs, an appropriate set will receive Technical Assistance (TA) including but not limited to project engineering services, curriculum development, translation services, and program support. The evaluation of the projects, plans, and programs will follow a set of evaluation criteria to be developed by the DCI TAC. ## Memorandum

Date: March 7, 2017

To: Arthur Hinojosa, Chief  
Division of Integrated Regional Water Management

Tracie L. Billington, P.E. Chief *TJB 3/7/17*  
Financial Assistance Branch

From: Division of Integrated Regional Water Management  
Department of Water Resources

Subject: Approval of Disadvantaged Community (DAC) Involvement Grant Award for the Santa Ana Funding Area

This memorandum requests your approval to award \$6.3 million in Proposition 1 DAC Involvement grant funding to the Santa Ana Watershed Project Authority (SAWPA) for the Santa Ana Funding Area proposal titled *Disadvantaged Communities Involvement Program*.

Proposition 1, the Water Quality Supply, and Infrastructure Improvement Act of 2014, was passed by California voters on November 4, 2014, and authorized the Legislature to appropriate \$510 million for IRWM, of which not less than 10 percent (\$51 million) was allocated for the purposes of ensuring the involvement of DACs, economically distressed areas, and underrepresented communities (collectively referred to as DACs) in IRWM planning efforts.

On August 1, 2016, the Department of Water Resources (DWR) issued the final Proposition 1 IRWM Grant Program Guidelines (Guidelines) and DAC Involvement Request for Proposals (RFP). The Guidelines present the general processes that are used by DWR to administer the Grant Program. The RFP contains solicitation-specific information for awarding the \$51 million, including delegation of the grant approval authority from the Director to the Chief of the Division of IRWM. For this solicitation, DWR requires a single Funding Area-wide proposal from each of the 12 Proposition 1 Funding Areas. DWR is accepting proposals on an ongoing basis with the goal of awarding all DAC Involvement funds by summer 2017.

On November 10, 2016, DWR received the DAC Involvement proposal from SAWPA on the behalf of the Santa Ana Funding Area. DWR reviewed the proposal based on the criteria published in the RFP, and returned comments back to SAWPA on December 22, 2016. Comments included a request for the following information:

- 1) A letter of support for the proposal from the Santa Ana Regional Water Management Group
- 2) Additional detail and evidence of the known DAC water management needs
- 3) A discussion on the barriers encountered when attempting to involve DACs in past activities

- 4) Additional discussion regarding the criteria that will be developed, as part of the Technical Assistance for Community Needs task, to evaluate DAC projects, plans, and programs
- 5) Completion of a funding area wide final assessment report
- 6) Examples to demonstrate the team's ability to successfully and timely complete the proposed activities
- 7) A basis for the cost estimate of proposed activities

SAWPA revised the proposal and submitted an amended proposal to DWR on January 25, 2017, in which most of the information was provided. On February 9, 2017, DWR received a complete basis of cost estimate which completed the amended proposal. The revised proposed addresses DWR comments and therefore, staff recommend the award of grant funds. Attachment 1 presents a brief proposal summary and list of the activities that were included in the final proposal.

Following your approval of the award, DWR will send a commitment letter to the grant recipient formally notifying the proposal approval, the grant amount, and conditions that must be met prior to the execution of the grant agreement.

## Attachment 1 Proposal Summary

### Proposition 1 Disadvantaged Community Involvement Grant Program

**Funding Area:** Santa Ana      **Applicant:** Santa Ana Watershed Project Authority (SAWPA)  
**Grant Amount:** \$6.3 million      **Proposal Title:** Disadvantaged Communities Involvement Program

**Proposal Summary:** By geographic area, 28 percent of the Santa Ana River watershed is considered as a Disadvantaged Community (DAC). The Santa Ana River watershed also includes a small area of sovereign tribal land (0.5 percent of the geographic area), some of which qualifies as a DAC. The SAWPA's One Water One Watershed (OWOW) planning efforts (i.e., their IRWM Plan) has identified general water management needs, as well as specific needs in some individual communities. DACs in the watershed cannot afford to invest in the infrastructure or maintenance necessary to meet or sustain their water needs; this is highlighted in the OWOW 2.0 Plan as the largest challenge. Other water management needs in the watershed include climate impacts on water supplies, legacy groundwater and local stormwater pollution, increased water demand through growth, and inadequate or limited understanding between water managers and community members.

The Santa Ana Funding Area DAC Involvement Proposal includes exploring the strengths and needs of DAC communities in the watershed, through engagement and education, uncover and share the needs and capacities within the water agencies and communities, and assure integrated water management projects that are supported by communities are made ready for implementation and prioritized in the OWOW Plan Update 2018.
