*George Upton All Access
Playground at Thornton Park*

City & Park Facility Improvements
Facility

"George Upton All Access Park" is a 1-acre site within Carl Thornton Park. One of the main components is the barrier free playground, designed to be not only fully accessible to disabled users, but in a way where all users, regardless of ability, can play side by side.

The original installation is now 30 years old, and the equipment is failing. Replacement parts are unavailable. Many of the customized features are deteriorating. This project will fully replace all playground equipment, built-in site play elements, interconnecting ramps and walkways, and rubber surfacing areas.
