Subject: Support the Purchase of EV pick up Trucks in item #13

The email is short and to the point. I support the purchase of the 5 Ford F150 EV pickup trucks. After passing a green resolution almost a year ago it is good to see this council finally do something in support of the Green Resolution.

I would suggest the council ask for an inventory of the city's own vehicles to see how environmentally friendly our fleet is. It would also help to measure any progress we make.

I also would like to see the city develop plans for adding solar power in the city. Saddleback HS generates 95% of its electrical needs. The solar system on my house has paid for itself in just 7 years. Our city is far behind SAUSD, the County and other cities in the OC in the development of solar power. We can make a difference and we should.
